

THIERNO IBRAHIMA LO

tlo4413@gmail.com • Dakar, Senegal • [LinkedIn](#) • [GitHub](#)

Software engineer with 5+ years building scalable systems that solve real user problems. Thrive in collaborative, fast-paced startup environments with end-to-end ownership—from understanding needs to shipping solutions. Excited about building financial technology that creates meaningful impact.

EXPERIENCE

Software Engineer, Pål(fyll)

Feb 2023 – Present

Sustainable energy platform with payment processing capabilities (Remote, Norway)

- Improved test coverage to 80% and introduced zero-bug policy, reducing production incidents by 60%
- Migrated CI/CD from Jenkins to GitHub Actions, reducing build time by 150% (15min → 6min)
- Optimized PostgreSQL payment queries (2.3s → 30ms), cutting infrastructure costs by 50%
- Implemented RAG system for customer support automation, reducing ticket response time by 40%
- Collaborated with frontend team on GraphQL APIs, improving E2E test speed by 85% (20min → 3min)
- Enhanced security with HashiCorp Vault, eliminating hardcoded secrets across 12+ microservices
- Improved frontend performance: reduced Largest Contentful Paint from 3.2s to 0.9s, significantly enhancing user experience

Tech: Python, FastAPI, Tornado, Node.js, GraphQL, TypeScript, React, Next.js, Kubernetes, Kafka, PostgreSQL, Redis, Docker, Langchain

Software Engineer, Finanzsoft GmbH

Mar 2022 – Jan 2023

Microservices infrastructure and full-stack development (Remote, Part-Time, Switzerland)

- Architected Docker-based microservices with Django/FastAPI and implemented security with HashiCorp Vault
- Designed Kubernetes cronjob policies for automated backups with 99.9% uptime
- Set up monitoring with ELK, Prometheus, and Grafana; managed 8+ microservices in production

Tech: Python, Django, FastAPI, GraphQL, React, TypeScript, Docker, Kubernetes, Redis, Prometheus, Grafana, ELK

Full-Stack Developer, Monaco Chartier

Sep 2021 – Feb 2022

Document management platform for criminal law firm (Remote, Part-Time, Toronto)

- Built full-stack application with OAuth2 authentication and React frontend
- Deployed on GCP with CI/CD, integrating Google Cloud Vision OCR for document digitization
- Implemented async task processing with Celery for handling sensitive legal documents

Tech: Python, Node.js, React, GCP, Docker, PostgreSQL, Celery, Redis, OAuth2

DevOps Engineer, Crowdbotics

May 2021 – Aug 2021

Infrastructure automation (Remote, Part-Time)

- Implemented Infrastructure-as-Code with Terraform on Azure
- Deployed Django/React applications with CI/CD using GitHub Actions
- Documented deployment processes for team reference

Tech: Azure, Terraform, Golang, Docker, GitHub Actions, Kubernetes

Freelance Software Engineer, Upwork (Top Rated Plus)

2020 – Present

100% Job Success Rate • 5.0/5.0 rating • 3,658+ hours across 15 projects

- Delivered full-stack, backend optimization, DevOps, and AI integration projects
- Built FastAPI APIs, Docker microservices, Celery + Redis async systems, and Azure cloud deployments

EDUCATION

Cheikh Anta Diop University (UCAD), École Supérieure Polytechnique

2022 – 2024

M.Sc. Computer Science - Online

Cheikh Anta Diop University (UCAD), École Supérieure Polytechnique

2019 – 2022

B.Sc. Computer - Online

SKILLS

- **Languages:** Python, Golang, JavaScript/TypeScript, Rust, C
- **Backend & APIs:** REST, GraphQL, gRPC, Microservices, Event-Driven Architecture
- **Databases & Caching:** PostgreSQL, MongoDB, Redis, Elasticsearch, Cassandra
- **Cloud & DevOps:** Kubernetes, Docker, AWS, Azure, GCP, Terraform, GitHub Actions
- **Message Queues:** Kafka, RabbitMQ, Celery, Redis Pub/Sub
- **Frontend:** React, TypeScript, React Native, Next.js, GraphQL
- **Other:** Git, Linux, TDD, CI/CD, Agile/Scrum

LANGUAGES

French (Native) • English (Fluent) • Arabic (Conversational)
